-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

NON-FINAL OFFICIAL ACTION

Status of the Claims

Claims 1-3 have been cancelled by Pre-Amendment.

Claims 4-6 are now pending.

Claims 4-6 are rejected under 35 USC §112.

Minor Informalities

Claims 4-6 were submitted as numbering 3-5. As a 1-3 previously existed within the application, the Office has renumbered the claims under Rule 1.126.

Rejections under 35 USC §112, second paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

While the claims in their entirety are difficult to understand, the following passages definitively prevent examination against the prior art:

In claims 4 and 5:

immediately countering a line failure via a provided interface module redundancy;
and

transmitting at least one of line failure messages and interface failure messages between interface modules of incoming and outgoing parallel signal lines in each of network nodes via a selector and at least one of an error message link and a transmission link.

In claim 6:

a selector, incoming data present at an output side of said interface module reach the processing unit via said selector, said at least two interfaces modules always contain said bridge circuit data that are transmitted via said signal lines, said selector selects via a change over between at least one of a working line and a protection line upon occurrence of at least one of a line error and an interface module error.
